

In June, I built a fence on the west side of my lot at 9915 Portland Avenue. I later found I had built this fence outside the requirements of City Code Section 21.301.08.

I have filed a request for variances for the fence to be taller than 4 foot w/ 50% opacity. I have requested to have a 6 foot fence with a 1 foot 4 inch lattice for a total of 7 foot 4 inches and 100% opacity. I have also requested an additional post height from 12 to 13 inches for planters and top post lights. A 6 foot fence built on any other than a corner lot would have been legal. I built this fence to have privacy and to keep my property as neat and organized as I can.

On 8-25-16 I am requesting that the Planning and Zoning Commission fully or in parts allow the variance I applied for in case file PL2016-128. I would appreciate your support with a signature. Thank you friends and neighbors.
